Positive Mental Health – Good Practice Guide

This guidance will always be routinely updated to reflect personnel changes.

Lead Members of Staff

Whilst all staff have a responsibility to promote the mental health of students. Staff with a specific, relevant remit include:

- Miss Helen Starr (HLS) - designated child protection / safeguarding lead / PSHE Lead
- Ms Sue Byrne - school counsellor
- Mr Craig Tribe – educational psychologist
- Mrs Jules Norman – SENDCo
- Mrs Lesley McMinigal / Mrs Ruth Bryan – ELSA
- Mrs Sarah Emery – learning mentor
- Mrs Christine Munday, Mrs Kay Carpenter , Mr Iain Cox - lead first aiders
- Mrs Sarah Deakin, Miss Philly Evans, Mr John McCoy, Ms Hayley Bond, Mrs Sarah Coventry, Mrs Charlotte Monaghan, Ms Mary Sweeney, Mrs Claire Greeves - pastoral leads

Any member of staff who is concerned about the mental health or wellbeing of a student should speak to the safeguarding lead in the first instance. If there is a fear that the student is in danger of immediate harm then the normal child protection procedures should be followed with an immediate referral to the designated child protection leads or the head teacher. If the student presents with a medical emergency then the normal procedures for medical emergencies should be followed, including alerting the first aid staff and contacting the emergency services if necessary.

Where a referral to CAMHS is appropriate, this will be led and managed by the safeguarding lead. Guidance about referring to CAMHS is provided in Appendix D.

Individual Care Plans

It is helpful to draw up an individual care plan for students causing concern or who receive a diagnosis pertaining to their mental health. This should be drawn up involving the students, the parents and relevant health professionals. This can include:

- Details of a student's condition
- Special requirements and precautions
- Medication and any side effects
- What to do, and who to contact in an emergency
- The role the school can play

Teaching about Mental Health

The skills, knowledge and understanding needed by our students to keep themselves and others physically and mentally healthy and safe are included as part of our developmental PSHE curriculum.

The specific content of lessons will be determined by the specific needs of the cohort we are teaching but there will always be an emphasis on enabling students to develop the skills, knowledge, understanding, language and confidence to seek help, as needed, for themselves or others.

We will follow the [PSHE Association Guidance](#)¹ to ensure that we teach mental health and emotional wellbeing issues in a safe and sensitive manner which helps rather than harms.

Signposting

We will ensure that staff, students and parents are aware of sources of support within school and in the local community. The school has a safeguarding page on the website with approved links to further information and sources of support. The links are aimed at students, parents and staff.

<http://www.ranelagh.bracknell-forest.sch.uk/school-information/safeguardingkeeping-safe/>

What support is available within our school and local community, who it is aimed at and how to access it is outlined in Appendix B.

We will display relevant sources of support in communal areas such as common rooms and toilets and will regularly highlight sources of support to students within relevant parts of the curriculum. Whenever we highlight sources of support, we will increase the chance of student help-seeking by ensuring students understand:

- What help is available
- Who it is aimed at
- How to access it
- Why to access it
- What is likely to happen next

Warning Signs

School staff may become aware of warning signs which indicate a student is experiencing mental health or emotional wellbeing issues. These warning signs should **always** be taken seriously and staff observing any of these warning signs should communicate their concerns with the safeguarding lead.

¹ [Teacher Guidance: Preparing to teach about mental health and emotional wellbeing](#)

Possible warning signs include:

- Physical signs of harm that are repeated or appear non-accidental
- Changes in eating / sleeping habits
- Increased isolation from friends or family, becoming socially withdrawn
- Changes in activity and mood
- Lowering of academic achievement
- Talking or joking about self-harm or suicide
- Abusing drugs or alcohol
- Expressing feelings of failure, uselessness or loss of hope
- Changes in clothing – e.g. long sleeves in warm weather
- Secretive behaviour
- Skipping PE or getting changed secretly
- Lateness to or absence from school
- Repeated physical pain or nausea with no evident cause
- An increase in lateness or absenteeism

Managing disclosures

A student may choose to disclose concerns about themselves or a friend to any member of staff so all staff need to know how to respond appropriately to a disclosure.

If a student chooses to disclose concerns about their own mental health or that of a friend to a member of staff, the member of staff's response should always be calm, supportive and non-judgemental.

Staff should listen, rather than advise and our first thoughts should be of the student's emotional and physical safety rather than of exploring 'Why?' For more information about how to handle mental health disclosures sensitively see appendix C.

All disclosures should be recorded in writing and held on the student's confidential file. Use the Ranelagh School Safeguarding Record Log form, ensuring you include the following information:

- Date
- The name of the member of staff to whom the disclosure was made
- Main points from the conversation
- Agreed next steps

This information should be shared with the safeguarding lead, who will store the record appropriately and offer support and advice about next steps. See appendix D for guidance about making a referral to CAMHS.

Confidentiality

We should be honest with regards to the issue of confidentiality. If it is necessary for us to pass our concerns about a student on then we should discuss with the student:

- Who we are going to talk to
- What we are going to tell them
- Why we need to tell them

We should never share information about a student without first telling them. Ideally, we would receive their consent, though there are certain situations when information must always be shared with another member of staff and / or a parent. If a student is at risk or is in danger of harm, no promises of confidentiality should be made and a referral to the safeguarding lead should follow immediately.

It is always advisable to share disclosures with a member of the pastoral team and the safeguarding lead, this helps to safeguard our own emotional wellbeing as we are no longer solely responsible for the student, it ensures continuity of care in our absence and it provides an extra source of ideas and support. We should explain this to the student and discuss with them who it would be most appropriate and helpful to share this information with.

Parents must always be informed when disclosures regarding a students' emotional or mental health and wellbeing are made. Students may choose to tell their parents themselves. If this is the case, the student should be given 24 hours to share this information before the school contacts parents. We should always give students the option of us informing parents for them or with them.

If a student gives us reason to believe that there may be underlying child protection issues, parents should not be informed, and the designated child protection leads must be informed immediately.

Working with Parents/Carers

Where it is deemed appropriate to inform parents/carers, we need to be sensitive in our approach. Before disclosing to parents/carers we should consider the following questions (on a case by case basis):

- Can the meeting happen face to face? This is preferable.
- Where should the meeting happen? At school, at their home or somewhere neutral?
- Who should be present? Consider parents, the student, other members of staff.
- What are the aims of the meeting?

It can be shocking and upsetting for parents/carers to learn of their child's issues and many may respond with anger, fear or upset during the first conversation. We should be accepting of this (within reason) and give the parent/carer time to reflect.

We should always highlight further sources of information and give them leaflets to take away where possible as they will often find it hard to take much in whilst coming to terms with the

news that you're sharing. Sharing sources of further support aimed specifically at parents/carers can also be helpful too e.g. parent/carer helplines and forums. This information can be found on the Keeping Well – Staying Safe pages of the school website: <http://www.ranelagh.bracknell-forest.sch.uk/safeguarding-parentscarers/>

We should always provide parents/carers with clear means of contacting us with further questions and consider booking in a follow up meeting or phone call right away as parents/carers often have many questions as they process the information. Finish each meeting with agreed next step and always keep a brief record of the meeting on the child's confidential record.

Working with All Parents/Carers

Parents/Carers are often very welcoming of support and information from the school about supporting their children's emotional and mental health. In order to support parents/carers we will:

- Highlight sources of information and support about common mental health issues on our school website
- Ensure that all parents/carers are aware of who to talk to, if they have concerns about their own child or a friend of their child
- Make our mental health policy easily accessible to parents/carers
- Share ideas about how parents/carers can support positive mental health in their children through our regular information evenings
- Keep parents/carers informed about the mental health topics their children are learning about in PSHE and share ideas for extending and exploring this learning at home

Supporting Peers

When a student is suffering from mental health issues, it can be a difficult time for their friends. Friends often want to support but do not know how. In the case of self-harm or eating disorders, it is possible that friends may learn unhealthy coping mechanisms from each other. In order to keep peers safe, we will consider on a case by case basis which friends may need additional support. Support will be provided either in one to one or group settings and will be guided by conversations by the student who is suffering and their parents/carers with whom we will discuss:

- What it is helpful for friends to know and what they should not be told
- How friends can best support
- Things friends should avoid doing / saying which may inadvertently cause upset
- Warning signs that their friend help (e.g. signs of relapse)

Additionally, we will want to highlight with peers:

- Where and how to access support for themselves

- Safe sources of further information about their friend's condition. These can be found on the school's website:
<http://www.ranelagh.bracknell-forest.sch.uk/student-safeguarding/>
- Healthy ways of coping with the difficult emotions they may be feeling

Training

As a minimum, all staff will receive regular training about recognising and responding to mental health issues as part of their regular child protection training in order to enable them to keep students safe.

We will host relevant information on our virtual learning environment for staff who wish to learn more about mental health. The [MindEd learning portal](#)² provides free online training suitable for staff wishing to know more about a specific issue.

Training opportunities for staff who require more in depth knowledge will be considered as part of our performance management process and additional CPD will be supported throughout the year where it becomes appropriate due developing situations with one or more students.

Where the need to do so becomes evident, we will host training sessions for all staff to promote learning or understanding about specific issues related to mental health.

Suggestions for individual, group or whole school CPD should be discussed with the CPD Coordinator, who can also highlight sources of relevant training and support for individuals as needed.

² www.minded.org.uk

Appendix A: Further information and sources of support about common mental health issues

Prevalence of Mental Health and Emotional Wellbeing Issues³

- 1 in 10 children and young people aged 5 - 16 suffer from a diagnosable mental health disorder - that is around three children in every class.
- Between 1 in every 12 and 1 in 15 children and young people deliberately self-harm.
- There has been a big increase in the number of young people being admitted to hospital because of self harm. Over the last ten years this figure has increased by 68%.
- More than half of all adults with mental health problems were diagnosed in childhood. Less than half were treated appropriately at the time.
- Nearly 80,000 children and young people suffer from severe depression.
- The number of young people aged 15-16 with depression nearly doubled between the 1980s and the 2000s.
- Over 8,000 children aged under 10 years old suffer from severe depression.
- 3.3% or about 290,000 children and young people have an anxiety disorder.
- 72% of children in care have behavioural or emotional problems - these are some of the most vulnerable people in our society.

Below, we have sign-posted information about the issues most commonly seen in school-aged children.

Support on all of these issues can be accessed via [Young Minds](http://www.youngminds.org.uk) (www.youngminds.org.uk), [Mind](http://www.mind.org.uk) (www.mind.org.uk) and (for e-learning opportunities) [Minded](http://www.minded.org.uk) (www.minded.org.uk).

Self-harm

Self-harm describes any behaviour where a young person causes harm to themselves in order to cope with thoughts, feelings or experiences they are not able to manage in any other way. It most frequently takes the form of cutting, burning or non-lethal overdoses in adolescents, while younger children and young people with special needs are more likely to pick or scratch at wounds, pull out their hair or bang or bruise themselves.

Depression

Ups and downs are a normal part of life for all of us, but for someone who is suffering from depression these ups and downs may be more extreme. Feelings of failure, hopelessness, numbness or sadness may invade their day-to-day life over an extended period of weeks or months, and have a significant impact on their behaviour and ability and motivation to engage in day-to-day activities.

³ Source: [Young Minds](http://www.youngminds.org.uk)

Anxiety, panic attacks and phobias

Anxiety can take many forms in children and young people, and it is something that each of us experiences at low levels as part of normal life. When thoughts of anxiety, fear or panic are repeatedly present over several weeks or months and/or they are beginning to impact on a young person's ability to access or enjoy day-to-day life, intervention is needed.

Obsessions and compulsions

Obsessions describe intrusive thoughts or feelings that enter our minds which are disturbing or upsetting; compulsions are the behaviours we carry out in order to manage those thoughts or feelings. For example, a young person may be constantly worried that their house will burn down if they don't turn off all switches before leaving the house. They may respond to these thoughts by repeatedly checking switches, perhaps returning home several times to do so. Obsessive compulsive disorder (OCD) can take many forms – it is not just about cleaning and checking.

Suicidal feelings

Young people may experience complicated thoughts and feelings about wanting to end their own lives. Some young people never act on these feelings though they may openly discuss and explore them, while other young people die suddenly from suicide apparently out of the blue.

Eating problems

Food, weight and shape may be used as a way of coping with, or communicating about, difficult thoughts, feelings and behaviours that a young person experiences day to day. Some young people develop eating disorders such as anorexia (where food intake is restricted), binge eating disorder and bulimia nervosa (a cycle of bingeing and purging). Other young people, particularly those of primary or preschool age, may develop problematic behaviours around food including refusing to eat in certain situations or with certain people. This can be a way of communicating messages the child does not have the words to convey.

Appendix B: Sources or support at school and in the local community

School Based Support

Sue Byrne – School Counsellor

Kerry Burnell – Intensive personal advice, Adviza

Alison Huckle – Youthline Counsellor

Aimed at students who are struggling with mental health issues for example eating disorders, anxiety, stress, depression, self-harm. Also for students experiencing bullying, cyberbullying, peer on peer abuse, family conflict, child sexual exploitation.

Students are identified for support via staff raising concerns. Referrals are made via the pastoral leads and the safeguarding lead. Students are signposted for support via tutors, assemblies and PSHE lessons.

The school also has a safeguarding section on the school website for students, parents and staff to access information and sources of further support. <http://www.ranelagh.bracknell-forest.sch.uk/school-information/safeguardingkeeping-safe/>

Local Support

Appendix C: Talking to students when they make mental health disclosures

The advice below is from students themselves, in their own words, together with some additional ideas to help you in initial conversations with students when they disclose mental health concerns. This advice should be considered alongside relevant school policies on pastoral care and child protection and discussed with relevant colleagues as appropriate.

Focus on listening

“She listened, and I mean REALLY listened. She didn’t interrupt me or ask me to explain myself or anything, she just let me talk and talk and talk. I had been unsure about talking to anyone but I knew quite quickly that I’d chosen the right person to talk to and that it would be a turning point.”

If a student has come to you, it’s because they trust you and feel a need to share their difficulties with someone. Let them talk. Ask occasional open questions if you need to in order to encourage them to keep exploring their feelings and opening up to you. Just letting them pour out what they’re thinking will make a huge difference and marks a huge first step in recovery. Up until now they may not have admitted even to themselves that there is a problem.

Don’t talk too much

“Sometimes it’s hard to explain what’s going on in my head – it doesn’t make a lot of sense and I’ve kind of gotten used to keeping myself to myself. But just ‘cos I’m struggling to find the right words doesn’t mean you should help me. Just keep quiet, I’ll get there in the end.”

The student should be talking at least three quarters of the time. If that’s not the case then you need to redress the balance. You are here to listen, not to talk. Sometimes the conversation may lapse into silence. Try not to give in to the urge to fill the gap, but rather wait until the student does so. This can often lead to them exploring their feelings more deeply. Of course, you should interject occasionally, perhaps with questions to the student to explore certain topics they’ve touched on more deeply, or to show that you understand and are supportive. Don’t feel an urge to over-analyse the situation or try to offer answers. This all comes later. For now, your role is simply one of supportive listener. So make sure you’re listening!

Don't pretend to understand

"I think that all teachers got taught on some course somewhere to say 'I understand how that must feel' the moment you open up. YOU DON'T – don't even pretend to, it's not helpful, it's insulting."

The concept of a mental health difficulty such as an eating disorder or obsessive compulsive disorder (OCD) can seem completely alien if you've never experienced these difficulties first hand. You may find yourself wondering why on earth someone would do these things to themselves, but don't explore those feelings with the sufferer. Instead listen hard to what they're saying and encourage them to talk and you'll slowly start to understand what steps they might be ready to take in order to start making some changes.

Don't be afraid to make eye contact

"She was so disgusted by what I told her that she couldn't bear to look at me."

It's important to try to maintain a natural level of eye contact (even if you have to think very hard about doing so and it doesn't feel natural to you at all). If you make too much eye contact, the student may interpret this as you staring at them. They may think that you are horrified about what they are saying or think they are a 'freak'. On the other hand, if you don't make eye contact at all then a student may interpret this as you being disgusted by them – to the extent that you can't bring yourself to look at them. Making an effort to maintain natural eye contact will convey a very positive message to the student.

Offer support

"I was worried how she'd react, but my Mum just listened then said 'How can I support you?' – no one had asked me that before and it made me realise that she cared. Between us we thought of some really practical things she could do to help me stop self-harming."

Never leave this kind of conversation without agreeing next steps. These will be informed by your conversations with appropriate colleagues and the schools' policies on such issues. Whatever happens, you should have some form of next steps to carry out after the conversation because this will help the student to realise that you're working with them to move things forward.

Acknowledge how hard it is to discuss these issues

"Talking about my bingeing for the first time was the hardest thing I ever did. When I was done talking, my teacher looked me in the eye and said 'That must have been really tough' – he was right, it was, but it meant so much that he realised what a big deal it was for me."

It can take a young person weeks or even months to admit they have a problem to themselves, let alone share that with anyone else. If a student chooses to confide in you, you should feel proud and privileged that they have such a high level of trust in you. Acknowledging both how brave they have been, and how glad you are they chose to speak to you, conveys positive messages of support to the student.

Don't assume that an apparently negative response is actually a negative response

"The anorexic voice in my head was telling me to push help away so I was saying no. But there was a tiny part of me that wanted to get better. I just couldn't say it out loud or else I'd have to punish myself."

Despite the fact that a student has confided in you, and may even have expressed a desire to get on top of their illness, that doesn't mean they'll readily accept help. The illness may ensure they resist any form of help for as long as they possibly can. Don't be offended or upset if your offers of help are met with anger, indifference or insolence, it's the illness talking, not the student.

Never break your promises

"Whatever you say you'll do you have to do or else the trust we've built in you will be smashed to smithereens. And never lie. Just be honest. If you're going to tell someone just be upfront about it, we can handle that, what we can't handle is having our trust broken."

Above all else, a student wants to know they can trust you. That means if they want you to keep their issues confidential and you can't then you must be honest. Explain that, whilst you can't keep it a secret, you can ensure that it is handled within the school's policy of confidentiality and that only those who need to know about it in order to help will know about the situation. You can also be honest about the fact you don't have all the answers or aren't exactly sure what will happen next. Consider yourself the student's ally rather than their saviour and think about which next steps you can take together, always ensuring you follow relevant policies and consult appropriate colleagues.

Appendix D: FOR PASTORAL STAFF ONLY

What makes a good CAMHS referral?⁴

If the referral is urgent it should be initiated by phone so that CAMHS can advise of best next steps

Before making the referral, have a clear outcome in mind, what do you want CAMHS to do? You might be looking for advice, strategies, support or a diagnosis for instance.

You must also be able to provide evidence to CAMHS about what intervention and support has been offered to the pupil by the school and the impact of this. CAMHS will always ask 'What have you tried?' so be prepared to supply relevant evidence, reports and records.

General considerations

- Have you met with the parent(s)/carer(s) and the referred child/children?
- Has the referral to CAMHS been discussed with a parent / carer and the referred child?
- Has the child given consent for the referral?
- Has a parent / carer given consent for the referral?
- What are the parent/carers/ child's attitudes to the referral?

Basic information

- Is there a child protection plan in place?
- Is the child looked after?
- name and date of birth of referred child/children
- address and telephone number
- who has parental responsibility?
- surnames if different to child's
- GP details
- What is the ethnicity of the child / family
- Will an interpreter be needed?
- Are there other agencies involved?

Reason for referral

- What are the specific difficulties that you want CAMHS to address?
- How long has this been a problem and why is the family seeking help now?
- Is the problem situation-specific or more generalised?
- Your understanding of the problem/issues involved.

⁴ Adapted from Surrey and Border NHS Trust

Further helpful information

- Who else is living at home and details of separated parents if appropriate?
- Name of school
- Who else has been or is professionally involved and in what capacity?
- Has there been any previous contact with our department?
- Has there been any previous contact with social services?
- Details of any known protective factors
- Any relevant history i.e. family, life events and/or developmental factors
- Are there any recent changes in the child's or family's life?
- Are there any known risks, to self, to others or to professionals?
- Is there a history of developmental delay e.g. speech and language delay
- Are there any symptoms of ADHD/ASD and if so have you talked to the Educational psychologist?

The screening tool on the following page will help to guide whether or not a CAMHS referral is appropriate.

INVOLVEMENT WITH CAMHS	
	Current CAMHS involvement – END OF SCREEN*
	Previous history of CAMHS involvement
	Previous history of medication for mental health issues
	Any current medication for mental health issues
	Developmental issues e.g. ADHD, ASD, LD

DURATION OF DIFFICULTIES	
	1-2 weeks
	Less than a month
	1-3 months
	More than 3 months
	More than 6 months

* Ask for consent to telephone CAMHS clinic for discussion with clinician involved in young person's care

Tick the appropriate boxes to obtain a score for the young person's mental health needs.

MENTAL HEALTH SYMPTOMS		
	1	Panic attacks (overwhelming fear, heart pounding, breathing fast etc.)
	1	Mood disturbance (low mood – sad, apathetic; high mood – exaggerated / unrealistic elation)
	2	Depressive symptoms (e.g. tearful, irritable, sad)
	1	Sleep disturbance (difficulty getting to sleep or staying asleep)
	1	Eating issues (change in weight / eating habits, negative body image, purging or binging)
	1	Difficulties following traumatic experiences (e.g. flashbacks, powerful memories, avoidance)
	2	Psychotic symptoms (hearing and / or appearing to respond to voices, overly suspicious)
	2	Delusional thoughts (grandiose thoughts, thinking they are someone else)
	1	Hyperactivity (levels of overactivity & impulsivity above what would be expected; in all settings)
	2	Obsessive thoughts and/or compulsive behaviours (e.g. hand-washing, cleaning, checking)

Impact of above symptoms on functioning - circle the relevant score and add to the total

Little or none	Score = 0	Some	Score = 1	Moderate	Score = 2	Severe	Score = 3
----------------	-----------	------	-----------	----------	-----------	--------	-----------

HARMING BEHAVIOURS		
	1	History of self harm (cutting, burning etc)
	1	History of thoughts about suicide
	2	History of suicidal attempts (e.g. deep cuts to wrists, overdose, attempting to hang self)
	2	Current self harm behaviours

2	Anger outbursts or aggressive behaviour towards children or adults
5	Verbalised suicidal thoughts* (e.g. talking about wanting to kill self / how they might do this)
5	Thoughts of harming others* or actual harming / violent behaviours towards others

* If yes – call CAMHS team to discuss an urgent referral and immediate risk management strategies

Social setting - for these situations you may also need to inform other agencies (e.g. Child Protection)	
Family mental health issues	Physical health issues
History of bereavement/loss/trauma	Identified drug / alcohol use
Problems in family relationships	Living in care
Problems with peer relationships	Involved in criminal activity
Not attending/functioning in school	History of social services involvement
Excluded from school (FTE, permanent)	Current Child Protection concerns

How many social setting boxes have you ticked? Circle the relevant score and add to the total

0 or 1	Score = 0	2 or 3	Score = 1	4 or 5	Score = 2	6 or more	Score = 3
--------	-----------	--------	-----------	--------	-----------	-----------	-----------

Add up all the scores for the young person and enter into Scoring table:

Score 0-4	Score 5-7	Score 8+
Give information/advice to young person	Seek advice about the young person from CAMHS Primary Mental Health Team	Refer to CAMHS clinic

*** If the young person does not consent to you making a referral, you can speak to the appropriate CAMHS service anonymously for advice ***
